EXOTIC BRAZILIAN
HARDWOODS**

100% FROM MANAGED FORESTS

WE ARE THE STANDARD FOR A REASON

Every board must encompass the highest quality standards that the most demanding professional clients tirelessly seek. That's why our wood is carefully handpicked, board by board, ensuring that every project receives only the finest premium architectural-grade lumber, making it the ideal choice even for the most demanding architects.

IPE
The King of hardwoods

GARAPA
Nature's golden treasure

FIRE RATED

TIGERWOOD
The finest stripes

BRAZILIAN REDWOOD
Beauty meets unmatched durability

RED BALAU
Rich colors lend unique beauty

INCREASED STABILITY IN EVERY BOARD

Every hardwood board goes through a careful kiln-drying process that uses an optimal temperature control system to increase its strength and structural performance. This increases the stability and reduces post-installation movement like warping, twisting, or bowing.

FIRE RESISTANT WOODS

Class A fire rating for IPE and GARAPA.

20% COOLER THAN COMPOSITE

Our hardwood products are safe to the touch. Lower heat retention than composites help naturally durable wood products deliver the coolest comfort for your outdoor applications.

Deck Sealers, Cleaners, Finishes

Professional Grade Ipe+ Marine Oil
Professional Grade Wood Deck & Cladding Cleaner
Professional Grade Wood Deck & Cladding Brightener
Professional Grade Ultra-Premium Wood End Sealer

HOW HARDWOODS ENDURE WEATHER

Hardwood only reflects its aging as you choose. Left unfinished, it does not require great care. Moisture and UV rays will oxidize woods from their rich, natural colors to a silver-gray patina in a matter of months.

To keep your wood's original color, an annual cleaning with Professional Grade Deck Cleaner and an application of Professional Grade Ipe+ Marine Oil is enough.

Finished or left to weather naturally, the organic beauty of hardwood boards shine through.
